

Programme

09 July

8:00-9:30 - Registration

9:30-10:30 - OPENING PLENARY SESSION

10:30-11:00 - Coffee break

11:00-12:30 - Parallel Sessions

1. Quality Indicators for Measuring and Enhancing the Composition of Survey Response (STS) organisers: Barry Schouten and Jelke Bethlehem chair: Jelke Bethlehem	2. Output Quality I chair: Inna Steinbuka	3. Quality Assurance chair: Jiri Krovak	4. Statistical Registers chair: Norbert Rainer	5. Response Burden chair: Eva Elvers
B. Schouten, J. Bethlehem Enhancing response by differentiated data collection strategies	T. Körner Can a statistician deliver coherent statistics?	A. Baigorri, H. Linden The use and convergence of quality assurance frameworks for international and supranational organisations compiling statistics	M. Christine, S. Faivre The French New Annual Master Sample 2009 : building fresh annual sample frames for household surveys based on the new annual Census	A. Nimmergut The Standard Cost Model (SCM) - a new field of activity for Official Statistics in Germany and its quality aspects
A. Sundvoll, Ø. Kleven Management tools for enhancing the composition of survey response	C. Calizzani, G.L. Mazzi, R. Ruggeri Cannata European Statistical System guidelines on seasonal adjustment: a major step towards PEEIs harmonisation	C. Julien Recent Quality Related Initiatives at Statistics Canada	G. de Abreu Antonaci, M.P. Soares de Freitas, M. Franca Lila, R. Vallejo de Azevedo Master Sample for the Brazilian integrated System of Household Survey	C. Hornbach, F. Spengler The Standard Cost Model (SCM) in Germany - target population and data quality assessment

A. Isaksson, P. Lundquist, D. Thorburn Use of process data to determine the number of call attempts in a telephone survey	A. Spizzichino, S. Loriga, R. Gatto Quality Evaluation of the Back-calculated Italian Labour Force Survey Time Series	D.A. Marker, M. Dingwall, M.D. Smith Reducing burden while increasing quality at a Government Agency	A. Bentley, S. Merad, K. Moore Investigating improvements in quality of survey estimates by updating auxiliary information in the sampling frame using returned and modelled data	V. Herrmann, C. Junker Reduction of response burden and priority setting in the field of Community statistics - initiatives at the European level
P. Biemer An Indicator of Nonresponse Bias Derived from Call-back Analysis	R. Barcellan, B. Newson, K. Wurm How to increase quality of Principal European Economic Indicators?	M. Dologová, J. Dolog Embedding knowledge management in the QMS	R. Vivio, V. Talucci, G. Petraccone The first Statistical Registry of Residents in Italy. Features and potentials.	J. Erikson, D. Hedlin, B. Lorenc Measuring Response Burden in Establishment Surveys: the Swedish Approach
	R. Munnich Quality of Knowledge Economy Indicators: Current status and researcher's needs	D. Jurelevičienė, B. Kaminskienė, J. Kelmelytė, L. Luksaitė Implementation of an ISO based Plan-Do-Check-Act cycle in Statistics Lithuania		D. Kavaliauskiene, B. Kaminskienė Real and imaginative response burden: different ways of treatment, measurement and reduction
Associated papers				
	G. L. Mazzi, R. Ruggeri Cannata A quality framework for Principal European Economic Indicators	E. Carless Measuring the Quality of Methods Used for the Measurement of Government Activity	M. Christine, S. Faivre Constitution, validation and sampling of Specific Primary Units (IAA, Interviewer Action Area) for the French New Master Sample 2009 adapted to French New Rotative Census.	S. Filiberti, M. Rinaldi Assessment of Statistical Burden on Italian Enterprises
	E. Bilotta, S. Palmieri, E. Trinca Systematic coherence and SBS statistics: The case of the inward FATS survey	M. Dologová, J. Dolog QMS implementation - from the basic form to the continual improvement	D. Guerra, D. M. Pessina An agreement act between two Offices of Ministry of Justice in Italy to achieve high quality in statistics	N. Rainer Measuring response burden under European context

	C. Cecconi , V. Pischedda How to measure output prices for services: a multicriteria analysis in an accuracy point of view.		J. Arends-Tóth, P. Daas Evaluation of the quality of administrative data at Statistics Netherlands	P. Revilla, I. Arbués, M. González-Villa Offering reporting enterprises free of charge data tailored to their needs
			S. Cozzi, D. Filippini Generalized Mixed Models to Evaluate the Coverage of Administrative Archives Used to Set up a Statistical Register.	F. Blasch Quality management support from Statistical Estimation Methods for the Standard Cost Model (SCM) implementation in Germany
12:30-14:00 - Lunch				
14:00-15:30 - Parallel Sessions				
6. New Census Methodology organisers: Daniela Cocchi and Ralf Münnich chair: Andrea Mancini	7. Data Integration I chair: Hakan Linden	8. Editing & Imputation I chair: Rudi Seljak	9. Quality Indicators chair: David A. Marker	10. Relevance and User Needs chair: Helena Cordeiro
S. Gabler, M. Ganninger, R. Münnich The sampling research project of the German register-based Census 2011	M. Denk , W. Grossmann Assessing Quality in Case of Data Integration	C. Quintano, R. Castellano, S. Longobardi Implementation and evaluation of imputation strategies to improve the data accuracy. The case of Italian students data from the Programme for International Student Assessment (PISA 2003).	G. Brancato, G. Simeoni Modelling survey quality by Structural Equation Models	M. Ribeiro, V. Morais Measuring Relevance of Statistical Information!
O. Abbott Coverage Assessment and Adjustment in the 2011 UK Census	O. Vasechko, M. Grun-Réhomme Data integration to study the enterprise group strategy in Ukraine	G. Vekeman Monitoring year-to-year variation in business statistics	K. Djerf Implementation of quality indicators in the Finnish statistics production process	P. Kuncova Communication with users in the Czech Statistical Office

G. Carbonetti, M. Fortini, F. Solari Innovations on methods and survey process for the 2011 Italian population census	A. Wallgren, B. Wallgren Correcting for coverage errors in enterprise surveys – A register-based approach	M. Templ, P. Filzmoser Visualisation of Missing Values before Imputation	D. Ladiray, G.L. Mazzi Towards a synthetic quality indicator for PEEIs	C. Stewart, C. Junker, A. Makaronidis, I. Steinbuka Satisfying User and Partner Needs- the Use of Specific Reviews at Eurostat
	T. Hethy, A. Spengler Some steps on the white map - Matching business data from different sources	R. Gismondi, F. Panizon, A. Cirianni Data Editing and its Effects on Estimates: a Short-term Business Surveys Appraisal	S. Børke, S. Gustad, J. Dahl Indicators for Managing and Improving the Data Collection Process	P. Ecochard, M. Hahn, C. Junker User Satisfaction Surveys in Eurostat and in the European Statistical System
	S. Horn Quality assurance surveys and program administration – when accuracy really counts		C. Arribas, D. Lorca, A. Salinero, A. Colmenero Measuring statistical quality at the Spanish National Statistical Institute	A. Miskiniene, B. Kaminskiene The system of customer satisfaction surveys and calculation of the customer satisfaction index in Statistics Lithuania
Associated papers				
	U. Kask New approaches for social data collection system in Estonia	F. Rocci, L. Serbassi The process of Editing and Imputation on large firms: between experience on field and computational standardization		
		M. Narilli, A. Nuccitelli Re-designing the editing process for the Italian data on foreign trade with countries outside the European Union: some quality issues and results		
		P. Massoli Modelling a Survey Questionnaire by Using Graphs Theory		

15:30-16:00 - Coffee break

16:00-17:30 - Parallel Sessions

11. Quality and users (STS) organisers: Programme Committee chair: Martina Hahn	12. Sampling Design and Estimation chair: Ralf Münnich	13. Survey Non-Response I chair: Kari Djerf	14. Questionnaire Design and Testing chair: Sara Hoff	15. Classification Issues chair: Hana Šlégrová
S. Vale Communication with the media- Improving accessibility in a changing world?	S. Hallépée, V. Loonis, M. Luc New Sampling Design of INSEE's Labor Force Survey	D. Roy Non-response and quality in diary-based surveys	H. Kiesl The effect of questionnaire length on response rates and level of estimates in the German job vacancy survey	F. Gallo, P. Scalisi To estimate the quality of classifications and to improve the coding process: the case of the occupations
D. H. Griffin Can We Trust Data Users to Consider Data Quality?	T. Laitila, J. Olofsson A two-phase fixed-size sampling design with unequal inclusion probabilities	J. Minnen, I. Glorieux Comparing a 2 and 7 day registration diary in time-use research. Evaluating the EUROSTAT guidelines	B. Gauckler Testing techniques for business surveys at the FSO - Methodology and results of two pretests-	C. Pinel Implementation of the NACE Rev.2 in the French structural business statistics and data retropolation method
H. Mikkela Maintaining and Supporting the Quality Brand of Official Statistics How to deal with revisions to and publication errors in published statistical data?	N. Razafindratsima, E. Morand An assessment of the robustness of weights in the Familles et employeurs Survey	A. Quatember A Generalisation of Randomized Response Techniques	M. Albisinni, E. Marzilli, F. Pintaldi Cognitive test related to labour force survey ad hoc module on migrants and their immediate descendants	A. Franco How the revision of a classification can affect quality of statistics
	J. Saralegui Quality implications of specific Sampling techniques in Environmental Surveys	M. Jansson, J. Svensson A Comparison Between Different Nonresponse Adjustment Methods Used in Some Swedish Surveys on Rare Items	J.P. Hubert, S. Roux Immobility measured by transport surveys, evolution of the questionnaire from 1993 to 2007	A. Ferrillo, S. Macchia, P. Vicari Different quality tests on the automatic coding procedure for the Economic Activities descriptions
Associated papers				

	I. Nikolaidis The effects of weighting, clustering and stratification on sampling errors as process quality indicators	O. Ekholm, M. Grønbaek The association between the recall period and the self-reported alcohol intake	D. Krebs Unipolar versus Bipolar Response Scale Format and Response Behavior	I. Valente A way to improve quality The Portuguese NSI experience in the implementation of a classification database
		A. Uudelt Respondents' attitude to data collection by CAWI method (based on CDH Survey)	J. McCarthy Using Data Mining Techniques to Examine Reporting Errors in Surveys	S. L. Schneider Progress in the Cross-National Measurement of Educational Attainment: Applying the ISCED-97 in European Countries

10 July

8:00-8:30 - Registration

8:30-9:30 - EARLY BIRD SEMINAR: Current trends in small area estimation

Partha Lahiri, Joint Program in Survey Methodology University of Maryland, College Park
chair: Daniela Cocchi

9:30-10:30 - Parallel Sessions

16. New Methodologies for European Indicators (STS) organiser: Ralf Münnich chair: Ian Perry	17. Variance Estimation chair: Partha Lahiri	18. Measuring Accuracy I chair: Giovanni Alfredo Barbieri	19. Quality Management Tools chair: Antonio Baigorri	20. Documentary chair: Eero Tanskanen
J. Bethlehem, B. Schouten Representativity Indicators for Survey Quality (RISQ)	T. de Wet, A. Neethling Accuracy of poverty and inequality analyses under complex sampling	F. Bassi, A. Padoan, U. Trivellato Assessing inconsistencies in reported job characteristics of employed stayers: An analysis on two-wave panels from the Italian Labour Force Survey, 1993-2003	E. Elvers New ways of working at Statistics Sweden – a description with emphasis on preparatory sub-processes	E. Tanskanen, M. Simpanen, K. Vikki A day in the life of an interviewer

M. Pratesi Small Area Methods for Poverty and Living Condition Estimates (SAMPLE)	M. Di Zio, S. Falorsi, U. Guarnera, O. Luzi, P. Righi Variance Estimation in Presence of Imputation: An Application to ISTAT Business Survey Data	A. Björnram, B. Lorenc, A. Persson, K. Wibell The Mysterious 36%: A Study of Measurement Error on a Sensitive Question in an Establishment Context	L. Bourque, F. Lapointe Institut de la statistique du Québec surveys: Compendium of recommended survey practices and survey quality self-assessment checklist	
R. Münnich Advanced Methodology for European Laeken Indicators (AMELI)	D. Place Longitudinal Variance Estimation in the French Labor Force Survey	C. De Vitiis, P.D. Falorsi, S. Falorsi, A. Pallara Sampling and non sampling errors in the Italian television audience measurement system	P.D. McGovern, J.M. Bushery Data Quality Standards at the U.S. Census Bureau	
Associated papers				
	S. Biffignandi, D. Toninelli Sampling quality in the price indexes	M. Mazziotta, F. Solari Different Estimation Methods to Evaluate the Interviewer Effect	E. Goni, J. San Vicente Standardisation and quality in EUSTAT	
	S. Falorsi, D. Moretti, P. Righi, C. Rinaldelli Experiences of Resampling Approach in the Household Sample Surveys	C. Mero, G. Giuliani The development of a data collection and monitoring system for a better quality as a result of the improvement of the organizational structure in the data collection phase		
10:30-11:00 - Coffee break				
11:00-12:30 – PANEL DISCUSSION: Quality challenges in the ESS				
12:30-14:00 - Lunch				
14:00-15:30 - Parallel Sessions				

21. Quality Indicators and Quality Measurement of Statistical Registers (STS) organiser: Norbert Rainer chair: Peter Hackl	22. Quality Reporting chair: Thomas Burg	23. Metadata and Documentation chair: Heli Mikkela	24. Statistical Disclosure Control chair: Metka Zaletel	25. Survey Design chair: Claudine Gasnier
N. Rainer Quality Reporting and Quality Indicators for Statistical Business Registers	J. Khelif A quality report on seasonally adjusted series	I. Morgado Metadata Life Cycle - Statistics Portugal	M. Isnard Legal aspects of quality	S. Häder, S. Gabler Mobile Phone Surveys in Germany - Outline and first results of a research project
P. Hokka, M. Nieminen Measuring the Quality of the Finnish Population Register	A. Berthomieu-Cristallo Quality framework in European Trade Statistics	M. Ayestarán, E. Goni, C. Prado Register of technical projects and questionnaires in the Basque Statistical Organisation	L.H. Cox Towards a Quality Assessment of Disclosure-Limited Statistical Data	L. Midy Design of the sampling frame of the 2008 French survey on disability and health
P. Daas, J. Arends-Tóth Quality framework for the evaluation of administrative data	S. Sleiman Quality Assurance at the European Monitoring Centre for Drugs and Drug Addiction, Lisbon	J. Prokop Subsystem QUALITY in Statistical Metainformation System	J. Drechsler, S Bender, S. Rässler Comparing Fully and Partially Synthetic Data Sets for Statistical Disclosure Control in the German IAB Establishment Panel	L. Galer, A. Negruta The Improvement of HBS in the Republic of Moldova
A. Allen, J. Perry Quality Assuring the UK Business Register	M.C. Congia, F. Rapiti Quality reporting in a short-term business survey based on administrative data	K. Blomqvist MetaPlus a metadata tool for the production process	D. Ichim Community Innovation Survey: a flexible approach to the dissemination of microdata files for research	G. Snijkers Getting Data for Business Statistics: A Response Model for Business Surveys
M. Consalvi, G. Garofalo; C. Viviano Quality in Statistics: the BR Case	N. Massarelli Improving the quality and the quality assessment of the Labour Force Survey	T.M. Isfan Variables System - the bridge between metadata and dissemination	G. Bruno, L. D'Aurizio, R. Tartaglia Polcini Remote processing of firm microdata at the Bank of Italy	M. Ballin, R. Carbini, M.F. Lo porcaro, M. Lori, R. Moro, V. Olivieri, M. Scanu The use of information from experts for agricultural official statistics
Associated papers				

		Z. Ercsey Development of Metadata System in CSO (Hungary)		M. Trappmann, B. Christoph , J. Achatz, C. Wenzig Labour Market and Social Security: A New Panel Study for Research on German Social Code II
				M. Davidsen The Danish Health Interview Survey 2005 – design, quality and non-response

15:30-16:00 - Coffee break

16:00-17:30 - Parallel Sessions

26. Quality Issues in Census chair: Frank Nolan	27. Quality Management chair: Maria João Zilhão	28. Editing & Imputation II chair: Ineke Stoop	29. Administrative Data chair: Lucie Laliberté	30. Output Quality II chair: Thomas Körner
L. Blackwell Census Quality - another dimension!	J.I. Arrieta, G.F. Gutiérrez Eustat management strategy based on total quality and excellence	T. Büttner, S. Rassler Multiple imputation approaches for Right-Censored Wages in the German IAB- Employment Register	F. Brisebois, R. Laroche, M. Beaulieu Evaluating the quality of tax data in the context of their use in business surveys at Statistics Canada	B. Hulliger, D. Lussmann, F. Kohler, A.M. Mayerat, A. de Montmollin Evaluation of Indicators on the Environment and Sustainability
S.A. Dias Carlos Quality Assurance and Control Programme in the 2011 Population and Housing Censuses in Portugal	L. Raittinen Managing Quality in the Finnish Greenhouse Gas Inventory	M. Ilves, T. Laitila Probability Sampling Approach to Editing	A. Chumbau, C. Neves, H. Pereira Simplified Business Information: improving quality by using administrative data in Portugal	A. Ciammola, T. Gambuti, A.R. Mancini Revision analysis to detect possible weakness in the estimation procedures. An application to the Italian IIP
G. Compton England & Wales Census Design - Assessing the quality impacts of posting Census questionnaires	S. Stoppoloni, M. Cimbelli, F. Navarra, A. Ottaiano Improving quality in management of NSI staff training&learning.	S. Cozzi, D. Filippini Outlier Identification Procedures for Contingency Tables in Longitudinal Data	S. Pacini, D. Tuzi Quality challenges in processing administrative data to produce short-term labour cost statistics	H. Hella, M.T. Härkönen, M. Salmela Statistical Quality Control: pilot experiments of Finnish Financial Survey Data

D. Chapman, D. Stempowski Using Quality Audits to Improve the 2007 Economic Census	R. Prual Implementation of EFQM Excellence Model in Statistics Estonia and lessons learned	D. Assoulin, D. Kilchmann Standardization of editing and imputation process indicators within the Swiss Federal Statistical Office	A. Bernardi, V. De Giorgi, F. Cerroni A methodological process for assessing variables coming from administrative sources: an application to the Tax Authority Source (Sector Studies)	D. Mota Methodologies for an Industrial Production Index: a study by simulation
	K. Williams Examining the development and practice of quality management at the UK Office for National Statistics, using both linear and non-linear based thinking	P. Scioch Quality of administrative data - bringing out the best. Testing data corrections for overlaps and inconsistencies		A. Capek Quality Aspects when Modernizing Intrastat
Associated papers				
P. Guy Operational Quality Management and the UK Census of population and housing	S. Mertanen Project Methods and Tools in Statistics Finland	P. Lindholm Evaluation of sources of error for improved timeliness	G. Rotondi , V. Spinelli The Roadmap for a Central Hub of Administrative Data: design and first results on the pilot case of 770-form business register	O.A. Vasechko, M.Grun-Réhomme A new synthetic index for qualitative short-term surveys
P. Benton Driving Census Quality through Business Process Modelling	A. Bokvajova The Excellence EFQM Model and its Application at the Czech Statistical Office	G. Giuliani, F. Pintaldi Use of simulation to impute data on wage and salary	H. Finselbach, S. Merad, K. Moore Improving the Quality of Employment Estimates Using Additional Data Sources	A. Brunetti, F. Polidoro, A.V. Rinonapoli Comparison between implicit and explicit methods for adjusting for quality change in Italian Consumer Price Survey: the case of durables
	C. Alvess Improving overall quality on statistical production through business reshape based on an industrial approach	V. De Giorgi Editing, imputation and validation of turnover data of the Italian Business Register	C. Catapano, T. Cesaroni, A. Lamberti An Efficiency Analysis of Public Expenditure at Local level: the case of Italy	P.R. Bernardini Decomposing aggregate economic indicators using a maximum entropy-based framework

8:00-8:30 – Registration

8:30-10:00 - Parallel Sessions

31. Peer Review of the EU Code of Practice (STS) organiser: Frank Nolan chair: Hana Šlégrová	32. Auditing and Self-Assessment chair: Claude Julien	33. Survey Non-response II chair: Andrea Giommi	34. Communicating Quality chair: Sibylle Von Oppeln-Bronikowski	35. Cross-National Comparability chair: Margit Epler
J. Matejcek Experience of the Czech Statistical Office with the European Statistics Code of Practice	M.J. Zilhão Statistical Auditing and Self-assessment - Benefits for Quality improvement	E. Rocco An application of nonparametric methods of adjusting for unit nonresponse using the data of a web survey on accommodation facilities in the province of Firenze	R. Seljak Standard errors presentation and dissemination at the Statistical Office of the Republic of Slovenia	U. Warner, J.H.P: Hoffmeyer-Zlotnik The Relevance of 'private Household' for Cross-cultural Survey Comparison
F. Nolan EU Code of Practice Peer Reviews 2006- 2008 - A Peer's Perspective	K. McSweeney A broader view of Internal Audit for Quality Management in NSIs - Application in Ireland and developments to consider	H. Orjala Enterprise respondents in focus - Enterprise data collection and quality assurance	A. Giguère, M. Filion Administrative and Survey Files for Research Purposes	P. Tzamourani, C. Sánchez-Muñoz Household Finances and Consumption Survey: Developing the Eurosystem Questionnaire
M. Hahn, S. Eidukynaitė Integrity, independence and accountability: the European Statistical System peer reviews	A. Agostinho Statistical quality control: the experience of the Banco de Portugal	A. Holmberg, B. Lorenc Understanding Participation and Response Mode Choices in a Survey	S. Guschwa Quality assurance of German balance of payments statistics	I. Stoop Quality strategies in cross-national surveys. The case of the European Social Survey

	Fung Hing-wang A Further Step in Quality Assurance for the Official Statistics of Hong Kong, China	J.P. Schröppler , J. Schupp, G.G. Wagner Who are the nonrespondents? An explanation of nonresponse in the Socio-Economic Panel (SOEP) using additional microgeographic characteristics of both respondents and nonrespondents.	T. Burg, P. Hackl, W. Holzer Quality at a glance. Documentation of Quality Indicators at Statistics Austria	P. Collesi Proposing editorial catalogue and presenting editorial products in English: some proposals for better translations having in mind users' needs.
	P. Ecochard, M. Szczęśna Quality Assessments of Statistical Production Processes in Eurostat	C. Quintano, R. Castellano, G. Punzo Evaluating the Total Non-Response Errors in the European-Union Survey on Income and Living Conditions (EU-SILC): A Territorial Quality Profile		A. Kettner, M. Stops National job vacancy surveys: the same or still different?
Associated papers				
	S. Marshall, R. Studley Implementing Quality Management in a Devolved Administration	J.R. Marcos, O.M. García Mixed methods of data collection in the 2007 Social Capital Survey in the Autonomous Community of the Basque Country	S. Montagna Measurement of the dissemination process as a support to evaluation and to the decision process	
			J. J. Zurikarai The EUSTAT Service Chart	
			N. Kiosseva Quality Declaration - an Internal Standard on Documenting of the Contents and Quality of Statistical Products	
10:00-10:30 - Coffee break				

10:30-11:30 - Parallel Sessions

36. Total Survey Error (STS) organisers: Programme Committee chair: Ger Snijkers	37. Small Area Estimation chair: Marc Christine	38. Measuring Accuracy II chair: Ugo Trivellato	39. Process Quality chair: Keith McSweeney	40. Data Integration II chair: Owen Abbott
P. Biemer, R. Beerten, L. Japac , A. Karr , M.Mulry, J. Reiter, and C. Tucke Recent Research in Total Survey Error: A Synopsis of 2008 International Total Survey Error Workshop (ITSEW2008)	M. D'Alò, S.Falorsi, L. Di Consiglio, F. Solari, M. Pratesi , N. Salvati, M. G. Ranalli Enhancing Small Area Estimation Methods - Applications to Istat's survey data	M. Simpanen, E. Tanskanen, K. Vikki Total Quality Management in Statistics Finland's Interview Data Collection Process	R. Viles, S. Green, R. Skentelbery Process Quality in ONS	S. B. Cohen Integrated Health Care Survey Designs: Data Quality Enhancements Achieved Through Linkage of Surveys and Administrative Data
	P. D. Falorsi, P. Righi A Balanced Sampling Approach for Multi-way Stratification Designs for Small Area Estimation	L. Martino, M. Fritz, M. Kasanko Comparison of validation procedures to detect measurement errors in an area frame sample survey	V. Sarioglo Prospects of Quality Reporting Implementation for State Household Sample Surveys in Ukraine	N. Cibella, M. Fortini, T. Tuoto The relationship between error rates and parameter estimation in the probabilistic record linkage context
